

Exercise 11: Styling Images with CSS

1. Select 5 images and save them for use in an HTML document.
2. Using CSS techniques change the style of these images to fit 5 of the 10 scenarios below. You will be using CSS, none of the images should be physically altered in any way.
 - A new image style for the National Geographic Web Site
 - Style for the cover image for a Children's Birthday Site
 - Style for the Biography photos on an insurance site
 - A title image with legible text written over it
 - Style for images on a professional photographer's site.
 - An image with a captions
 - Style for Food photography images on the Martha Stewart Site
 - A style for images on your soon to be created portfolio
 - A style that changes when you mouseover it
 - A style for a newspaper site
