

Exercise 6: Float and Position

Using float and position create a document that contains the following:

- Text with an image floated left
- Text with an image floated right
- Text with a section of special text floated left or right
- Text with an image floated left and text floated right
- Text with an image and text floated left
- Text with an image position set to relative(pick any pixel values you like)
- Text with an image position set to absolute(pick any pixel values you like)
- Text with an image position set to fixed(pick any pixel values you like)
