

You don't have to be a programmer to use Javascript

Using Javascript

What is Javascript

- A scripting program language used to add interactivity to web pages- Javascript was designed to look like Java but they are not technically related.

Javascript only looks scary...

- Anybody can use Javascript to add interactivity to their sites
- To successfully use most Javascripts you need to do the following:
 - Cut and Paste
 - Read directions
 - Edit simple code

Finding Reliable Javascript
